

2007 RSA Scientific Meeting ABSTRACT CATEGORIES

NOTE: Be sure to mark your 1st (number/letter) and 2nd (number/letter) category choices on the Abstract Form.

These categories should also be used for the Program Proposal Form.

Select the category that best fits your abstract - do not leave blank. The current list won't be changed this year, but please send your suggestions for future consideration.

Keep in mind, the primary purpose of the categories is to help us in assigning reviewers and to group posters at the meeting. It is not meant to be all inclusive of various research sub-categories.

1. Genetics

- a. human
- b. lab animal - behavioral
- c. lab animal - transgenics/ knock-outs/ins
- d. other
- e. microarrays/genomics - human/animal

2. Molecular / Cell Biology C.N.S.

- a. postranslation modification
- b. gene expression
- c. membrane biology
- d. other

3. Pharmacology C.N.S.

- a. neurotransmitters
- b. neuropeptides
- c. other
- d. medications development

4. Physiology C.N.S.

- a. electrophysiology
- b. imaging - nonhuman
- c other

5. Animal Behavior

- a. motor
- b. learning/memory
- c. consumption/self-administration
- d. stress/anxiety
- e. other

6. Pathology: human/animal

- a. neuropathology
- b. immunology
- c. hepatic
- d. other organ/system

7. Fetal Alcohol Syndrome/Development

- a. cell biology
- b. physiology
- c. behavior
- d. human

8. Determinants of alcohol consumption in humans

- a. neurobiology and neuro-imaging
- b. negative affect regulation (affective disturbance, stress, anxiety)
- c. positive affect regulation (reward seeking)
- d. social/cultural norms (beliefs, attitudes, values)
- e. cognitive determinants (info processing, expectancies, motivation)

9. Consequences of alcohol consumption in humans

- a. health harms
- b. social harms (family, financial, legal or work problems)
- c. mood and affect
- d. learning and cognition
- e. perceptual-motor

10. Prevention

- a. Environmental risk assessment (community, family, work, college)
- b. school and other individual-based interventions
- c. organization and community-based interventions
- d. policy

11. Treatment / Recovery

- a. assessment and diagnosis
- b. psychotherapy
- c. self-help
- d. brief intervention
- e. pharmacotherapy

12. Epidemiology

- a. alcohol consumption rates, drinking patterns
- b. alcohol abuse, dependence
- c. morbidity and mortality
- d. special populations (children/adolescents, ethnic groups, gender)
- e. other

13. Pharmacokinetics and Metabolism

14. Health Services

- a. services utilization
- b. access to service
- c. health economics

15. Fetal Alcohol

- a. diagnosis
- b. pathology
- c. neurobiology
- d. behavior/cognition
- e. prevention and treatment
- f. other

16. Quantitative / Computer Methods

17. Training / Education Methods
