

A favorite portion of the FASDSG meeting will again be the FASt data session. For this session, there will be brief presentations (1 slide, 5 minutes plus a short question interval) of exciting new findings. Presentations will be selected by the FASDSG officers from submitted abstracts (see instructions below). Selection is competitive with preference given to new unpublished findings and with consideration to balance across all disciplines represented in the FASDSG. This is an excellent opportunity to highlight new findings and for new investigators to present their research interests.

**Send your abstracts to FASDSG Vice President, Dr. Feng Zhou, via email to the address below on or before May 9, 2008.** Selection of presentations will be completed by June 1, 2008, and notification will be made by return email.

Abstracts to:  
Feng Zhou, Ph.D.  
Department of Anatomy and Cell Biology  
MS 508A  
635 Barnhill Drive
